- Marketing your web site

Defeat spam with our new **NOSPAM** solution!

Presenting the very latest and most powerful tool to prevent viruses and junk email from reaching your computer. NOSPAM is an email protection service that provides each user with a web-based Message Center where your spam and viruses are filtered and quarantined. Your legitimate email messages are delivered to your email inbox, just as they always have, but junk and virus-infected email is routed to your Message Center. NOSPAM filtering is simple, powerful, and safe - you're in control.

Trust your email (and your spam) to the professionals: the technology behind our NOSPAM service has won the PC Magazine Editors Choice Award for the last two years as the best anti-spam service on the market.

When your service is activated you will be sent detailed instructions on how to access your Message Center and how to get the most out of your protection against email junk and viruses.

The NOSPAM service grabs email that appears to be junk or virus-infected and redirects it to a password-protected online Message Center where you can review and retrieve selected messages if you wish. You will be able to set the level of restrictiveness, specify what kinds of subject matter you want filtered, and specify senders who are always or never filtered.

You can even "disinfect" mail that has been "quarantined" because it appears to contain a virus, and then receive only the safe part of that mail.

How do I get NOSPAM for my domain?

Please contact us today for more information on how to stop the spam, and protect yourself from unwanted mail, viruses, and worms. sales@moff.com or (360) 394-9601.

Moff Interactive Announces the Addition of a New Employee

Jeremy Moff is pleased to introduce Carol Gates to you. Carol very recently started working part time to assist with marketing and promotions. She looks forward to being a valuable asset to Moff Interactive.

Seattle Marketing Firm praises Moff Interactive designed web site!

Regarding The Bloedel Reserve (www.bloedelreserve.org) photographs and web site, they are both stunning. I have a marketing consulting practice and provide marketing/design services for companies and government agencies..... seldom have I seen a site that is as nicely done as yours. The bird sounds, video tour and images are just terrific and collectively they create quite a sensory impression of the reserve. You should be very proud of your accomplishment.

How to pick a Web Designer

- Do they have a design background and technical skills in the current industry standard software?
- Are they capable of communicating your message in a style that is consistent with your company's identity?
- Are they capable of providing complete internet solutions; hosting, e-commerce, dynamic database driven web application, marketing, and consultation?
- Check references. Find a company that has a reputation for good customer service and that has gone the extra mile to please many other customers. Review their portfolio.
- Do they test on multiple web browsers and platforms?
- Can the designer serve as a consultant and provide you with information that will allow you to make the right decision for creating a successful web presence?
- Once the site is built do they provide options for you to make updates and provide options for you to hire them to maintain your web site?
- Do they have a grasp on designing search engine friendly web sites? Can they provide you with a number of marketing options?

Recently Completed Projects and Awards

Moff Interactive of Kingston is pleased to announce the completion of the following internet project: www.thornburghinsuranceagency.com, a Bainbridge Island Insurance company. A new web site Design for CFA Properties, Inc., a real estate company on Bainbridge Island has been completed.

The Golden Web Award was recently presented to Moff Interactive for www.naturallandscapes.org. This award is presented to those sites whose web design, originality and content have achieved levels of excellence deserving of recognition.
